Chief Executive Officer  
Gympie Regional Council  
(by email)

Attention: Mike Conroy

Dear Sir,

**OPW2015-1158 Rural Residential Subdivision Stage 2 Allotment Filling**

We enclose plan 0828-tests which shows the approximate locations of fill building pads and test results for allotments that have been filled.

I certify that proof rolling, inspections of pads and the test results enclosed for allotment filling have been carried out to AS3798 Level 2 standards.

Geotech S,C.Pty Ltd were subcontracted to undertake sampling and inspect the pads. Roberts Bros. personal undertook fill placement and compaction.

The frequency of density testing conducted being 42 tests for 19 house pads with one to three tests per house pad is in line with the minimum frequency recommended in table 8.1 of AS 3798-2007 for Type 2 earthworks ie.1 test per lot per layer

Yours faithfully,  
**Callaghan & Toth**
